

AMPRNet IP Coordination Germany

The German www.de.ampr.org **AMPRNet**tm IP-Coordination is a working group which has been elected by the community of all german radioamateurs. It works in a kind of „**AMPRNet National IP Registry (ANIR)**“ for the german parts of the worldwide TCP/IP-network for Radio-Amateurs, also called NET-44 or **AMPRNet**tm. DL-IP-Coordination Germany is supported by regional maintainers in a kind of „**AMPRNet Regional IP Registry (ARIR)**“. In many german sub-regions these guys are the responsible persons for any questions, problems and requests from radioamateurs out of those sub-regions concerning participation in the NET-44. **ARIRs** can manage their submitted IP-ressources independantly within the region they are responsible for.

Overview

Quick Links

HAMNET - services, structure, AS-Numbers, BGP and more
